EDUCATION

Rutgers Business School

Bachelor of Science in Finance and Computer Science
Bachelor of Arts in Data Science

New Brunswick, NJ

May 2027

- **GPA: 3.94 | Honors:** Rutgers Honors College, Dean's List (All Semesters)

WORK EXPERIENCE

Rutgers School of Environmental and Biological Sciences

Intern, Data Analyst

New Brunswick, NJ

Sep 2025 – Present

- Eliminated 40+ hours of annual manual verification across 300+ buildings by engineering Power Automate solution, enabling semi-annual cycles and eliminating data entry errors impacting facility management
- Enabled real-time progress tracking via dynamic notifications, improving task completion by 35% and reducing follow-ups
- Executed workflow re-architecture cutting software costs 60% by replacing premium connectors with native SharePoint solution while preserving 100% reliability

Moweb Technologies

Intern, Data Team

Secaucus, NJ

Jul 2025 – Aug 2025

- Developed ETL workflows in dbt-core and SQL, fixing null conflicts and reducing pipeline failures from 20+ weekly to <1
- Delivered optimized financial metric extraction for client reporting, reducing processing times by 40% for real-time analysis
- Directed LLM integration across team workflows, designing workshops that decreased manual reconciliation time by 30%

Kaktus Sportswear

Intern, Financial Operations

Carlstadt, NJ

Jul 2024 – Aug 2024

- Initiated cost structure analysis of shipping and inventory purchases, identifying inefficiencies leading to 15% cost reduction
- Implemented month-end close process optimizations by implementing automated financial reconciliation, reducing processing time by 25% while eliminating manual errors and strengthening the accuracy of \$300K+ monthly transaction reconciliations
- Investigated vendor payment fluctuations to bolster audit readiness and mitigate risks associated with financial discrepancies

PROJECTS

GrindSheet | Fitness Tracking PWA

May 2025 – Aug 2025

- Launched a fitness PWA after identifying market whitespace for simple, social tracking via competitive analysis of 20+ apps
- Decreased user input time 60% through 3-step flow by conducting observational research with 15+ gym-goers, prioritizing speed over comprehensive logging based on behavior patterns
- Increased engagement 40% through gamified badges and leaderboards, leveraging behavioral psychology to drive retention

Sunny – Live Insurance Co-Pilot | Microsoft Hackathon

Jun 2025

- Pitched a proof-of-concept real-time risk engine to Microsoft judges, processing 6+ live data sources to model dynamic quotes
- Designed streaming pipeline with Pathway to analyze 43+ data points, balancing technical feasibility and accuracy
- Built an LLM co-pilot on a FastAPI backend to serve personalized recommendations with natural language explanations

LEADERSHIP AND COMPETITIONS

Rutgers Shark Tank – "PerkPal"

Business & Technical Lead, Startup Competition Finalist

Piscataway, NJ

Mar 2025

- Led a cross-functional team of 3 to top 6 finish (from 30+ teams) by effectively balancing business strategy with technical execution
- Developed business case for rewards consolidation platform identifying \$2.4B+ opportunity in fragmented loyalty programs, while building live proof-of-concept demo in React and Selenium
- Presented venture pitch to investor panel, securing finalist recognition for platform's scalability and technical innovation

Jang Star Taekwondo

Class Instructor, 1st Degree Black-Belt

Jersey City, NJ

Nov 2014 – Apr 2023

- Led classes for students of all ages and skill levels, including those with learning difficulties, by adapting teaching methods
- Achieved 100% trial student return rate by implementing personalized learning techniques and enhancing client retention strategies, resulting in a 30% increase in client acquisition and demonstrating strong user retention strategies
